

Purity Protected**VIST™ Labs LLC & VIST Technologies****What We Do**

VIST™ Labs LLC and VIST Technologies deliver the industry's first true end-to-end mobile, pharma-grade science and technology solution to screen, decontaminate, and AMAPS™ package cannabis and cannabis-infused products to enhance the consumer experience. The VIST proprietary mobile approach provides safer, consistent, and high-quality cannabis for consumers and profitability with risk reduction for cultivators, processors, and dispensaries.

What We Offer

Unlike other industry platforms, VIST offers a fully integrated proprietary system that includes:

- Temperature-controlled, customized Sprinter vans designed for a lifespan of more than 300,000 miles; all work is done in customer's licensed facilities.
- A fast and reliable screening system to identify the level of mold, yeast, and other bacteria that may be present in flower or shake before and after the VIST process.
- CryoPasteurization™ decontamination technology designed to kill mold, yeast, and other bacteria while retaining terpene and cannabinoid levels as well as positive organoleptic qualities of cannabis. The patent-pending technology rapidly pasteurizes cannabis to remove harmful contaminants without irradiation.
- Aseptic Modified Atmosphere Packaging (AMAPS) to reduce transportation spoilage risks and extend product shelf life.

The VIST AMAPS technology is the cumulation of many years of developments within the pharmaceutical and food industries. VIST founders are pioneers in extended shelf-life packaging of perishable goods including injectable drugs and infant formulas. They hold over 220 patents in the field.

VIST vehicles include areas for WIFI data collection and inventory management, screening kits used in customer facilities, packaging equipment and materials, and supplies to improve inventory management.

Our Vision

VIST believes every consumer deserves clean cannabis. Quality control that incorporates cryopasteurization and AMAPS packaging are important steps in fulfilling that promise.

Franchising

To meet growing demand for proven, science-based cannabis testing and decontamination processes, VIST Labs LLC is making its proprietary technologies available to entrepreneurs who want to become part of the new VIST Franchise Systems LLC. VIST technologies address concerns with yeast, mold, and other bacteria through early detection, eradication, and decontamination for products while assuring plant quality. VIST Franchise Systems LLC is operating in Colorado and is selling in Oregon. Future locations in the U.S. and Canada will be added soon.

Working With Us

VIST makes it easy for licensed cultivators and processors to maximize cannabis crop yield, inventory, and price.

VIST Labs LLC is headquartered in Schaumburg, IL.
